

Biology Independent Project Proposal Presentation

This TWO minute timed presentation is your opportunity to present to your classmates and your teachers your well-thought idea for your independent project.

1. Fill out the independent project proposal sheet in full (the back page of your independent project packet).

2. Your presentation should be short, articulate, and to the point.

You must:

- state the topic of your project**
- state the hypothesis that you will test**
- explain your experiment**
- list any materials that are not already available**

3. Your project will either be approved as is, you will be required to make and submit changes to the teacher, or you will be required to completely revise.
